

MAHMOUD FARID

Android Developer | PropTech & Community Apps

Cairo, Egypt | +201157124733 | mahmoud.farid620@gmail.com | Military Service: Completed

PROFESSIONAL SUMMARY

Android developer specialising in property tech and community management platforms. At Arabia Holding, built and deployed six connected enterprise apps covering resident services, sales, operations, gate access, marketing, and customer support, backed by a Ktor backend, Vtiger CRM, and AWS Lightsail. Experience includes AI-powered request routing, QR-based access control, NPV payment plan generation, and CRM automation.

TECHNICAL SKILLS

Domain: Property Management Platforms, Community Apps, Real Estate CRM, Gate Access Control, Resident Services

Languages: Kotlin

Mobile: Jetpack Compose, Dagger Hilt, Retrofit, Firebase, Coroutines, Navigation Compose, Material Design

Architecture: Clean Architecture, MVVM, SOLID, OOP

Backend & Cloud: Ktor, RESTful APIs, AWS Lightsail, Deployment & DevOps

CRM: Vtiger CRM (Integration & Customisation), Zoho CRM (Customisation & Workflow Automation)

Other: NPV Calculations, Payment Plan Generation, AI Chatbot Integration, Firebase Realtime Database

WORK EXPERIENCE

Android & CRM Developer · Arabia Holding

February 2025 – Present

Real estate enterprise ecosystem: 6 Android apps, Ktor backend, Vtiger CRM, AWS Lightsail

Designed, developed, and deployed six interconnected enterprise Android applications for a real estate company, connected to a unified Ktor backend integrated with Vtiger CRM:

Arabia Holding App (Resident & Community Portal)

- ❑ Built an AI-powered request classifier that automatically routes resident tickets to the correct department
- ❑ Integrated a company knowledge base chatbot that guides residents through required steps and documents, and can submit CRM tickets on their behalf
- ❑ Implemented visitor QR code generation for secure gate access management
- ❑ Developed an instalment and payment plan viewer showing residents their full financial schedule
- ❑ Built family member and tenant management for shared unit access
- ❑ Created a social community feed supporting news posts, likes, and comments
- ❑ Developed a lead portal where prospective buyers browse projects, register interest, and are automatically created as leads in Vtiger CRM

Arabia Sales App (Sales Agent Tool)

- ❑ Built an interactive masterplan with real-time unit availability and status management
- ❑ Enabled sales agents to flag units as interested, add comments, and contact leads directly from the app
- ❑ Implemented an NPV-based payment plan generator allowing agents to create and forward payment proposals to the operations team

Arabia Operation App (Operations & Finance)

- ❑ Built a payment plan dashboard for the operations team to review NPV-generated proposals from sales
- ❑ Implemented edit, approve, and reject workflows before payment plans are committed to CRM

Arabia Marketing App (Content & Community Management)

- ❑ Developed a content management tool for the marketing team to publish community news, announcements, and advertisements

Arabia Gate App (Security Gate)

- ❑ Built a QR code scanner for validating visitor entry at security checkpoints
- ❑ Implemented real-time gate notifications pushed from resident requests

Arabia Customer Service App (Support Team)

- ❑ Developed a centralised ticket inbox for the customer service team
- ❑ Agents can view, track, and respond to resident requests end-to-end

Infrastructure & Deployment

- ❑ Architected and built the Ktor backend connecting all six apps to a single data layer
- ❑ Integrated backend with Vtiger CRM for unified resident, sales, and support data management
- ❑ Managed full deployment pipeline and infrastructure on AWS Lightsail

Android & CRM Developer · El-Shark Textile

June 2024 – January 2025

- ❑ Customised Zoho CRM to streamline company-wide business workflows, automating key sales and customer service processes
- ❑ Developed Android applications to improve real-time communication between sales representatives and customer service teams
- ❑ Integrated Firebase for real-time data handling, push notifications, and live messaging

EDUCATION

B.Sc. in Computer Science · Mansoura University

2018 – 2022

Faculty of Computers and Information | Grade: Good | Graduation Project: BabyCare App (Excellent)

OTHER PROJECTS

Weathering With You

Personal Project

- ❑ Weather app using device location services and RESTful APIs with dynamic visuals and city search
- ❑ Built with Clean Architecture, Dagger Hilt, and Navigation Compose
